Subject: Re: Animal AG and Stormwater

David: Sorry I missed this. The relevant program contacts for CAFO are Gary Kelman and Horacio Tablada, Director of the Land Management Administration. Horacio's email is: Horacio.Tablada@Maryland.gov.

I don't think there is a need to notify Department of Ag on this assessment since MDA acknowledges out sole authority in CAFO NPDES.

On the other issue, I'll call you this week. I want to make sure that we come into agreement on what types of inspections you think need to happen. But I think we can wrap this long conversation up easily.

Hi Jay,

I know that you do not have to deal with this, but I come seeking your sage advice. I believe you have heard about this already, but we need to conduct Animal Ag Program Assessments under a settlement with CBF. Last year, we initiated assessments of VA and PA. This year we are required to initiate assessments of our other three states. We would like to start the notification process, and I was wondering who in MDE (besides Gary) and who in Dept of Ag should receive notice of this. Can you suggest some contacts? Thanks in Advance!

On another note, do you have time to talk about the CMS issues in the joint work plan, so that we can finish that up?

Look forward to hearing from you,

David
